

Wake Up, Made Up... With Permanent Makeup by Tricia

Imagine swimming, running or being out in the sun without smudges, streaking or runny make-up, no more touch-ups or constant prepping in the mirror. Your prayers have been answered.

Permanent make-up is a tattooing process. "Permanent" means it cannot be washed off and just like a tattoo it eventually fades. In most cases an iron oxide (ingredient used in make-up) pigment is used instead of the traditional tattoo ink. This is inserted into the skin to produce a fuller brow, lined eyes, lined lips or even full lip color. Topical anesthetics are used to help with discomfort and help to take the edge off. A thorough consultation is done to determine if you are a good candidate for the procedure, and if so what would be most flattering for you.

Permanent Make-up is ideal if you don't know how, don't have the time, or you're just tired of having to apply your make-up everyday. It's also great if you have over tweezed brows or they just don't grow. You can wake up made up every day. For more info call Tricia at Eclipse - **945-1188**.
