Beauty and fashion for Fall 2014 is about surprising texture.

Mattes and metallic's will dominate makeup. Lady like dresses will be made of athletic fabrics or lush knits, and the hottest hair looks will be mix straight, teased, and curled pieces. Here are some great ways you can add fall's beauty, fashion, and hair trends to your breezy, warm-weather styles. You can take ideas from the craziest fashion and can incorporate it into your wardrobe for a fresh, new look. This fall, be a little rock star and try something bold!

Have fun with fall, and let your individuality be your guide!

1. Gunmetal Nails

Gray metallic nails replace from the creamy pastels and electric neon nail polish of spring and summer. If you are not ready to go quite that dark, a creamy gray matte manicure is chic and fun.

Tip: Gray nail polish is the perfect backdrop for nail art. Try a delicate white lace design for the perfect transition to fall.

2. Silver is THE Color for Fall Fashion

Jennifer Lopez, Amber Rose, and Iggy Azalea were all seen in striking silver ensembles. While their looks were a bit more "Game of Thrones" than what is acceptable for every day, a bold metallic piece of clothing or bold accessory looks future perfect!

3. Crop Tops will be Everywhere

Crop tops are everywhere, and they are surprisingly flattering. Unlike their 80's and 90's incarnation, the new crop top is paired with a high-waisted pant or skirt to give an alluring flash of skin, while maintaining a great proportion.

Tip: A shimmery body lotion applied to the front of the legs, makes you appear taller!

4. Pants are the New Skirt

Yes, pants are optional (not really), but they can elevate an evening look in a timeless way. A 40's inspired wide-legged pant can make day or evening fashion luxuriously vintage.

Tip: Wide legged is going to be the hottest silhouette in denim.

5. Matte Lipstick

Every major makeup line will have a matte lipstick line this fall, but you don't have to wait until the leaves fall to be a bold-lipped beauty. Wear a pink or peach matte lip with fresh skin and lots of lashes for a fashion forward look.

Tip: For a more dramatic look, add some gold powder to the center of the lips for some extra glow.

6. Mod Hair

Get ready, because the bump is back! Straight hair with lots of volume was all over the runways for Fall 2014. While the weather may still be a bit too humid to channel your inner Jackie O, you can still make a ponytail look chic by adding a bit of volume to your crown.

Tip: Take this look to the limit with the addition of a gold-chain headband.

7. A-Line Dress

According to Hollywood stylist <u>Rachel Zoe</u>, short, A-line dresses will be a staple this fall. This ultraflattering fashion works with any body type and can be worn with sandals in the summer or tights and a cardigan in the colder months.

Tip: This fall is all about fun prints. Because the cut of this dress works on everyone, you can be bold!

8. Fabulous Flat Shoes

While chunky heels and bedazzled pumps will be important for Fall 2014, flats are going to be a fashion staple. Pair the next seasons "it" shoe with boyfriend jeans, or an a-line dress, you will look adorably retro while giving your feet a rest.

Tip: Metallic's are in! Silver flats are surprisingly versatile!
