

## **Enhance Your Eyes!**

Eyes are so much a perfect feature that can enhance your look and showcase your beauty if just a little attention is given.

With so many different eye enhancing treatments available on the market these days it's difficult to know what each one does and which ones would suit your lifestyle best. Here's a look at some of our favorites here at Eclipse:

**Eyelash and Brow Tinting-** Lash tints, work best on people with lighter-colored lashes (especially blondes!). However many people have lashes that fade at the ends. So when they are tinted, they can seem a lot longer. Lash tinting is a great option for women who have busy or active lifestyles. You can run out the door with no mascara, hit the gym or the beach, and not worry about your mascara running. A brow tint works for everyone! With defined, well-groomed brows, it gives you a thicker style and a more youthful appearance. Both the eyebrow and eyelash tinting treatment will last about four to six weeks.

**Eyebrow Shaping** – Shaping your brows whether it is by waxing or threading them can make a dramatic difference to your look! Your eyebrows shape your face. Eyebrows that have been gently arched visually lift and open up the eye area. This allows more room for eye shadow and brings about a more youthful appearance to the face. Facial features can be softened or accentuated just by shaping the brows.

**Eyelash Perming** - An Eyelash Perm is a semi-permanent curling treatment that can last up to 8 weeks! It will instantly give eyelashes more length and creates the illusion of bigger, brighter, ultra feminine eyes. An Eyelash perm is a safe and effective treatment and is suitable for both men and women.

**Semi-Permanent Eyelash Extensions** – Eyelash extensions are fabulous for anyone looking for longer fuller lashes. They come in all different varieties. The most popular are Strip lashes which are fantastic for an evening event or special occasion and then there is the Semi-Permanent eyelash extension. They do take a bit more maintenance but they are definitely worth it! The extensions can last up to 8 weeks depending on how you care for them.

At eclipse we also offer a **Bright Eyes Treatment by June Jacobs-** This rejuvenating eye treatment is designed to firm and tone the eye area, soothes puffy eyes and helps to diminish fine lines; leaving your eyes bright and youthful.
