

The Benefits of Gel Nails!

Gel nails are a popular product that have been around for many years but are still fairly new in the Caribbean Region.

Gel nails are different to gel polish, they are made up of a thick, jelly-like substance that is applied onto your natural nail or nail tip enhancement and then placed under a UV light to cure & set.

Some of the benefits of using Gel are:

- It has no odor and little to no drilling on your nail bed is needed depending on the state of your nails.
- The consistency of the gel is flexible and lighter so it gives you a more natural feeling than acrylic, but you can also have the strength you desire.
- Gel gives you a perfect glossy finish.
- Your gel nails can last from 2 to 3 weeks before a refill is needed.
- You can also use regular nail polish or gel polish on your gel nails.
